

MiQare

**DigiRx**

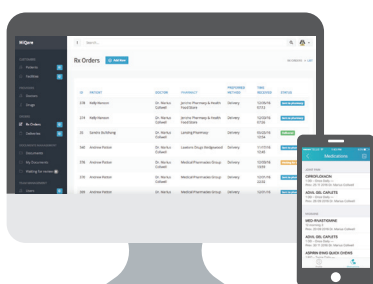

MiQare is an innovative pharmacy software company with an intent focus on increasing the efficiency of healthcare providers and improving the safety and health outcome for patients. Aligned with this mission, MiQare has developed a digital prescription ordering system to efficiently streamline the recording and filling process of Rx orders.

MiQare DigiRx provides healthcare facilities with secure, reliable, and user-friendly hardware and software to record, manage and fill prescriptions digitally.

## THE HARDWARE

As part of the DigiRx solution, MiQare provides smartpens and customizable paper pads to record prescriptions digitally in real-time. The transcription of Rx orders occurs instantly and requires no manual duplication. All prescriptions that are recorded with a smartpen and paper automatically appear in the DigiRx management dashboard where they can be viewed, edited, and processed.

## THE SOFTWARE

With DigiRx, healthcare facilities can securely manage digital prescription from any web browser or with the MiQare mobile application. Rx orders recorded with the DigiRx smartpen and paper are organized neatly in the management dashboard, making them easy to search, filter, process, and fill. DigiRx health records and Rx orders can also be accessed remotely with any mobile device through the MiQare mobile application. For advanced security, MiQare has implemented end-to-end encryption to protect all patient health data.

## FROM PAPER TO DIGITAL PRESCRIPTIONS

- ✓ No manual prescription data entry and duplication
- ✓ Reduced time spent recording Rx Orders
- ✓ Decreased margins for error

## SECURE MANAGEMENT OF ALL DIGITAL PRESCRIPTIONS

- ✓ Secure remote access to patient health records
- ✓ Easily search, organize, and manage Rx Orders
- ✓ Automatic back-up files as audit trails

## USER-FRIENDLY EPRESCRIPTION TECHNOLOGY

- ✓ Easy to configure and use
- ✓ Affordable SmartPen hardware
- ✓ Customizable SmartPaper notepads
- ✓ Software compatibility with all iOS & Android devices & standard web browsers

MiQare DigiRx is now available to healthcare facilities and providers in Canada.
